FAQ

Q: How does the Energy System work?

A: The typical diet is surrounded by processed foods high in fat, calories, and refined carbohydrates. These types of foods can leave you feeling run-down and exhausted. By swapping out junk foods with the nutrient-dense products of the Isagenix Energy System, you should feel better, more energized, and have greater focus to power through your day.

Q: What should I expect during the first few days of my journey?

A: You should notice a change in your energy levels in the first few days. These products can help you feel more awake during the day, sleep better at night, and improve focus and clarity when you need it most.

Q: What does “no-compromise quality” mean?

A: The Isagenix No-Compromise Ingredient Policy ensures that all of our products are made in accordance with the highest standards of Good Manufacturing Practices for dietary supplements. We subject all of our raw ingredients to rigorous testing to ensure purity, identity, and safety.

Q: What are Adaptogens and how do they work?

A: Adaptogens are natural botanicals with unique characteristics to help your body combat the negative effects of stress, focus the mind, and elevate daily performance.[†] They are found in e+™ and Ionix® Supreme in your Energy System.

Q: What is an e+ energy shot?

A: e+ is a long-lasting and flavorful energy shot made with a targeted amount of plant-based caffeine from green tea and yerba mate to help you feel energized and mentally alert.[†] e+ is formulated with a scientifically supported blend of Adaptogens and botanicals to boost energy and fight fatigue without any artificial flavors, colors, or sweeteners.

Q: Is coffee a healthy beverage?

A: The consensus on coffee went back and forth for many years, but the latest research shows drinking coffee is a safe and effective way to improve focus and alertness during the day, and can even be a useful boost before workouts. An adult can safely drink up to five cups of coffee per day.

Q: Is coffee dehydrating?

A: The caffeine in coffee has a mild, short-term diuretic effect, but this doesn't diminish the fluid your body receives from drinking coffee. Remember, black coffee contains more than 95 percent pure water.

Q: If I'm not hungry can I skip a meal or shake?

A: You should always listen to your body, but staying energetic during the day also means you need the right nutrition, at the right time. At the very least, you should eat two 400-600 calorie meals and one IsaLean® Shake per day, and add in more products and snacks as needed. If you need meal ideas, see Pages 11-12 of this guide.

Q: Can I add fruit to my IsaLean Shake?

A: Absolutely! Fresh fruits are filled with fiber, essential nutrients, and make a delicious addition to your shakes. You can also add one scoop of Isagenix Fruits™ to your shakes for a flavorful, nutritious boost.

Q: What is melatonin and how does it work?

A: Melatonin is a substance naturally produced in the body that regulates sleep, and supports restful, quality sleep. The melatonin found in Sleep Support & Renewal™ can help you fall asleep faster and achieve a better night's sleep so you can feel awake and energized in the morning.[†]
